Aqua Clear Water Systems

Aqua-Max II

The Aqua-Max II is designed to meet the high demands for cold and hot water in high traffic areas. The intuitive paddle operation and tall dispensing area enables users to easily fill large jugs and carafes. With an ultraviolet system to maintain water hygiene and large capacity tanks, you are assured a continuous supply of clean and refreshing water.

Aqua Clear's latest high capacity water dispenser for demanding environments.

Making Water Great

This dispenser offers two great steps to fresh water:

1. Filtration: A choice of filters to remove chlorine and other waterborne tastes and odors*. When water conditions are particularly bad, an RO filtration system will remove virtually all contaminants.

2. UV Sanitization: In-line UV purification system sanitizes the water by reducing bacterial growth giving a reassurance of fresh clean water.

* Where applicable.

High quality water in volume

- Cold and hot options
- Easy to clean and use faucets
- Hot water safety feature to protect against accidental usage
- Tall dispensing area is ideal for filling large jugs and carafes
- In-line UV lamp maintains water hygiene
- Available with RO filtration (reverse osmosis) to make the poorest quality water good
- Sleek profile for good looks and castors on base for easy relocation
